CAREER OBJECTIVE

Driven Software Development Engineer with expertise in Flutter and mobile application development, seeking to leverage my skills to deliver innovative and efficient solutions in a dynamic, growth-focused environment.

EXPERIENCE

Antino Labs – Gurgaon | JUNE 2024 – PRESENT

Associate Software Development Engineer – January 2025 - Present

Software Development Engineer Intern - June 2024 – December 2024

CMG Maritime – Mumbai | JANUARY 2024 – MAY 2024

Software Development Engineer Intern- Jan 2024 – May 2024

Projects

- Ubuild -Simplify Construction**–Flutter, Dart, Firebase, Push Notifications, riverpod.

Successfully completed a mobile application for the construction industry connecting suppliers, contractors, and customers. Deployed in both Appstore and Playstore.

- Developed a mobile app connecting suppliers, contractors, and customers in the construction industry.
- Designed material listings, service profiles, and a review system to enhance user interactions.
- Integrated real-time notifications and inventory updates for seamless
- Utilized Firebase for database management, user authentication, and real-time syncing.

- Tranzact Lite – Document, Inventory and Business Management Tool –**

- Flutter, Dart, Firebase, Push Notifications, Riverpod.
- Developed a cross-platform business management application for document inventory and marketing management.
- Leveraged Riverpod for efficient state management, ensuring seamless data handling and UI updates.
- Integrated Firebase for real-time data synchronization and user authentication.
- Deployed the application on both App Store and Play Store, ensuring smooth accessibility across iOS and Android platforms.
- Implemented push notifications for instant marketing updates and document tracking alerts.

- **ZoreTime – Health and Fitness App** – Flutter, Dart, Firebase, Google Maps Integration, Bloc cubit
 - Developed a mobile application allowing users to find nearby gyms, view their services, and check amenities.
 - Implemented Google and Apple login for seamless user authentication.
 - Designed and developed the UI/UX, ensuring an intuitive and visually appealing user experience.
 - Integrated Google Maps for real-time location tracking and displaying nearby gyms.
 - Ensured smooth navigation and optimized app performance for both iOS and Android platforms.
- **Task and Event Management Application** – Flutter, Node.js, AWS, Google Meet Integration, Bloc Cubit
 - Built a task and event management application from end to end, enabling organizations to efficiently distribute tasks within teams.
 - Developed the back end using Node.js to handle task assignment, user management, and scheduling operations.
 - Implemented Google Meet integration, allowing users to directly schedule and join meetings within the app.
 - Designed the front end using Flutter, delivering a seamless and intuitive user experience.
 - Deployed the application on AWS, ensuring scalability, security, and high availability.
- **White Tiger** – Criminal Identification System for Eluru District Police – Flutter, Dart, Getx, Firebase
 - Developed a criminal and suspect identification system by integrating facial recognition technology to match scanned faces with existing police records.
 - Enabled new case registration with detailed suspect information and evidence attachment.
 - Handled complex image conversion and processing, ensuring accurate and efficient facial matching.
 - Designed and implemented a smooth and intuitive UI/UX for seamless police operations.
 - Optimized performance for real-time image scanning and processing, ensuring fast and reliable results.
